Experience

Boulevard Legacy LLC

Full Stack Developer - Freelance

Jul 2025 – Nov 2025

Remote - New York, USA

- Built an AI powered platform that analyzes content before publishing, providing instant feedback, quality scoring, and actionable optimization suggestions to help creators and marketers improve engagement.
- Created an AI driven media kit generator that helps creators showcase audience insights and performance metrics through automatically updated, brand-ready PDFs and shareable portfolio links.

Keryar

Full Stack Developer - Intern

Feb 2025 – Jun 2025

Anand, Gujarat, India

- Worked on Teacher's Performance Evaluation Scheme project.
- Built a user-friendly interface for institutions to submit teacher's data and simplify administrative workflows.
- Designed an admin panel for reviewing submissions, assigning teacher IDs, and maintaining organized digital records.
- Software built using Angular, Node.js and MYSQL.

Projects

[Cluezy AI](#) | Next.js, TailwindCSS, Supabase, Redis, Upstash, Vercel Ai Sdk, Composio, Stripe, Motion

- AI powered research and productivity platform supporting web search, academic search, Reddit research, weather queries, GitHub search, and X (Twitter) search through a unified AI interface.
- Implemented multi-format content processing, enabling users to search and analyze PDFs, DOC, PPT files, summarize website content, analyze YouTube videos, and chat with uploaded documents.
- Built third-party app integrations allowing users to connect and interact with services like Gmail, Google Drive, Google Docs, and Google Sheets etc directly via natural language queries.

[Whispy](#) | Electron.js, React.js, TailwindCSS, Groq, OpenAI

- Built a cross platform ai powered voice dictation app for Windows and macOS enabling real time speech to text with push to talk functionality.
- Integrated Groq Whisper Large V3 for ultra-fast, low-latency transcription with near-instant response times
- Implemented auto-paste into active applications and customizable global hotkeys for seamless background usage
- Enhanced transcription quality using OpenAI based text refinement to remove filler words and improve grammar

[Pixsy](#) | Flutter, Bloc, Firebase (Authentication, Firestore, Storage)

- A cross-platform social media application using Flutter, BLoC, and Firebase, enabling users to share photos and connect with others.
- Implemented Firebase email authentication, user profiles, follow system, and user search to support social networking and user discovery.
- Developed core engagement features including photo posting with captions, likes, comments, and real-time chat messaging.
- Designed a responsive UI with light/dark mode support and optimized the app for Android, iOS, and Web.

Education

Bachelor of Science in Information Technology

From DNICA, Anand, Gujarat

Jun 2022 – Apr 2025

CGPA – 7.86
